# Grab Your Advertisement Space in 42<sup>nd</sup> Edition

Railways Year Book has become an annual tradition for all the Railway Offices, with advent of new financial year the works on data collection for 42<sup>nd</sup> Edition of the book has started and we are accepting advertising proposals from the industry.

Over the years, it has been our endeavor to publish the most crisp and concise summary of developments in Indian Railways each year and we are thankful to the Railway Authorities for providing us timely updates on the developments and milestones achieved during year. It is this commitment which makes the publication a unique product, year on year.

Railways Year Book remains one of the most anticipated publications dedicated to Railways fraternity because it presents the factual data and updates for every Railway Institution in one single publication each year. Making it a shared platform for railway institutions to record their yearly achievements and also refer to what's happening across their peers' departments/offices.

We would also like to thank our esteemed industry participants and advertisers who with their enthusiasm and active participation make the publication viable year after year.
